Global Animal Health Conference 2017

17 November 2016 | New Delhi, India

Conference Overview

The 5th in the series of Global Animal Health Conferences is organised with the support of the Organising Committee partners and funded by the Bill & Melinda Gates Foundation (BMGF). The conference is scheduled to take place on 17 November 2016 in New Delhi, India. Government representatives, regulators, senior animal health experts, industry, academia, inter-governmental bodies and international organisations will exchange views on the importance of good regulatory governance of veterinary medicines. Sound governance and alignment to international standards promotes improved animal health that in turn contributes to socio-economic development. The focus will be on India and South Asia and the need for appropriate regulatory systems to enable the registration, market access and market control of quality assured animal health products, and the contribution this makes to the 'One Health' vision.

Conference Aims

To increase political and stakeholder awareness and support for better animal health and better access to quality assured animal health products.

To increase the understanding of the needs of different stakeholders and regulators in the region with regard to regulatory harmonisation.

Conference Objectives

- Identify challenges relating to the registration process and improved market access for authorised veterinary medicines and how to promote the implementation of suitable systems.
- Explore the importance and benefits of regulatory convergence, including alignment to international standards and guidelines, and identify the key parameters enabling countries to implement them.
- Identify the needs, responsibilities and challenges relating to control of product quality during manufacture and control of products throughout the distribution chain.
- Through case studies, explore the needs for capacity building, mutual recognition and regional organisations in the efficient implementation of regulatory systems.

Pre-Conference

Wednesday, 16 November 2016

- Networking Drinks
- Conference Dinner with guest speaker

Conference

Thursday, 17 November 2016

- Conference Opening & Keynote Lecture
- Session 1 | Challenges Relating to Market Access
 - Indian Perspective
 - Challenges facing the production-animal sector in an Asian country
- Session 2 | Improved Registration Processes to Increase Access to Animal Health Products
 - Improving regulatory frameworks
 - Regulatory convergence
 - Case study - Latin America
- Session 3 | GMP and Market Control
 - Control of manufacturing
 - Control of the market place
- Session 4 | Regional Organisations and Mutual Recognition
 - Case study - regional organisation in Asia
 - Case study - mutual recognition in Asia
- Session 5 | Wrap-up and Closing
 - Summary of conference
 - Recommendations and action points

Full programme and more information on how to apply will be available shortly.
